Figure 1

Figure 1 shows two bar charts side-by-side. The left chart is titled "Number of cases by age group" and the right chart is titled "Number of cases by gender". Both charts have "Number of cases" on the y-axis, ranging from 0 to 100 in increments of 20. The x-axis for both charts has three categories: "Age Group", "Gender", and "Total". The left chart shows the number of cases for each age group: 0-17 (approx. 60), 18-64 (approx. 90), and 65+ (approx. 10). The right chart shows the number of cases for each gender: Male (approx. 60) and Female (approx. 90). The total number of cases is approximately 150.
